

**OWNERS' COMMUNITY OF THE CARAVEL·LA BUILDING  
CALA SALIONÇ URBANISATION, TOSSA DE MAR (GIRONA)**

In Tossa de Mar, on 15 August 2026, in the hall of the Association of Residents and Owners of Cala Salionç, at 10:00 a.m. on second call, the owners of the Caravel·la Building meet in Ordinary General Meeting, following prior notification by the President of this Owners' Community.

Attending owners: A2, A3, A7, B1, B3, B7

Delegated votes: B2

Absent: A1, A4, A5, A6, A8, B4, B5, B6, B81.-

**1.-Approval of the 2025 Assembly minutes and the 2026 Extraordinary Meeting minutes**

The agreements recorded in the aforementioned minutes are recalled and both are approved unanimously.

**2.- Information on interventions and projects carried out Fibre optics:**

The project could not be carried out due to installation difficulties caused by existing FO cables. Another provider was consulted and does not recommend carrying out the project under these conditions, with installed FO cables that cannot be adapted to the defined route. They present an alternative solution consisting of an open L-profile trunking covering the route of the already installed cables. For future installations, a margin of 2 metres of coiled cable is required in order to absorb possible changes in the route.

**Insurance:** It is recalled that we already have the policy contracted with MAPFRE.

**Water leaks from the roof,** above dwelling B3 and at the chimney due to leaks in dwellings B6 and A6. It is agreed that the architect may carry out an inspection of the roof, as we frequently have incidents due to leaks.

**3.- Proposed interventions and agreements**

The submitted offers from NouBau and Extend are reviewed, the conditions are discussed and, based on the technical information in the available report by Mr Torner,

**Agreement:** the project is awarded to the company Nou Bau.

**Agreement:** To entrust the management of the licence with the Town Council and the project direction to the architect Mr Torner.

**Agreement:** Start in October, depending on the availability of suppliers and the licence.

**Agreement:** The intervention will begin with garages A1 and A2, and will continue sequentially with A3, A4, then A5 and A6, and finally A7 and A8, taking into account that it must be coordinated with the columns project and must be completed before the next ITE (Technical Building Inspection), scheduled for 2030.

**VERY IMPORTANT – SPECIAL LEVY (DERRAMA)**

**AGREEMENT:** A special levy is approved as a provision of funds of €450 for dwellings A1, A2, A3, A4, A5, A6, A7, A8, B5 and B6, and of €300 for dwellings B1, B2, B3, B4, B7 and B8, which will be invoiced quarterly together with the current ordinary fees. There will be four (4) instalments for type A dwellings (including B5 and B6) of €225 each, and for type B dwellings four (4) instalments of €150 each. First invoice in the first week of October 2026. In the case of apartments B2 and B6, which have annual payment, a payment is proposed in the first week of January: B2 (€300) and B6 (€450), and a second payment in the first week of June: B2 (€300) and B6 (€450).

**Agreement:** Annual maintenance work on the roof and gardening is approved.

**Agreement:** As already approved in the previous financial year, to carry out the definitive installation of the provisional water connection in apartments A6, A7, B6 and B7. The need to respect the agreements, municipal regulations and to maintain the aesthetics of the building with regard to visible installations on both the façade of the A dwellings and the façade of the B dwellings is recalled.

**4.- Presentation and approval of the accounts statement and budget 2026-2027**

The accounts statement for the 2025-2026 financial year is approved unanimously.

The estimated budget for 2026-2027 is approved unanimously.

Balance as at 23/08/2025: €22,969.35

Balance as at 12/08/2026: €26,448.72

Income from fees: €5,850

Income from special levies: €5,850

Estimated budget 2026/2027: €18,390.44

## 5- Functions and renewal of positions

No candidacies have been submitted to take on the positions of the Owners' Community. Therefore, the positions of the previous Board are extended for one more year with the approval of those present. The reduced availability of the current office-holders due to new personal circumstances is noted. The positions are constituted as follows:

President: Lluís Puig (B7)

Vice-President: José Fernández (B1)

## 6- Questions and comments

Mr Francesc Valero (JR) is introduced as the Community's lawyer and it is commented that next year the Community will have to submit form 347 to the Tax Office and that the possibility of increasing the community fee for rental apartments should be considered. Some external cracks have been detected that should be repaired; an inspection will be carried out to assess the cost of the repair.

### As a reminder and not discussed at the Assembly:

#### **HUT apartments (Tourist Use Housing).**

There is interest on the part of the Association in having control over HUTs and preventing tourist rentals from taking place without the dwelling being legalised and registered for this use.

On behalf of the Owners' Community of the Caravel·la, we remind owners of a HUT apartment that they have the obligations established by Law and, in particular, the obligation to inform tenants of the community rules of coexistence of the Caravel·la building. Other aspects linked to HUTs are not dealt with because, in order to do so, the agreements would have to be reflected in the legalised Statutes of the Owners'

#### **Community.Coexistence.**

Certain situations relating to neighbours' behaviour that hinder coexistence have been detected.

It is recalled that the community statutes set out the guidelines to be followed in sections 4 and 5:

**Article 4:** With regard to noise produced by gatherings, radio, TV and sound reproduction equipment, etc., an appropriate sound level shall be maintained, especially after 11 p.m., so as not to cause disturbance to neighbours.

With regard to smoke and odours, cooking on terraces or holding barbecues is not permitted. **Article 5:** Owners, including tenants, are responsible for the cleaning of common areas such as staircases, landings, etc.

Regarding the cleaning of the accesses to the apartments, the owners are solely responsible. In the case of apartments with a rotation of users (timeshare, rentals or other modalities), owners are required to extend the cleaning of the same to the common access areas to the dwelling mentioned (staircases and landings, up to the door or entrance to the apartment in question).

It is important, in the case of rental of a dwelling, to make clear the Community rules that tenants must observe and know; according to the regulations, the owner is responsible for doing so.

**Aesthetics**  
**Air conditioning (according to current regulations):** "a municipal licence is required for installation; installation on the façades (in our case A and B) will not be permitted"; we remind you that any replacement operation would involve moving the AC unit to the roof.  
**Weather events and outstanding matters.**

Regarding **automatic irrigation** systems and accumulation of water on terraces, the need to regulate irrigation and ensure that pools of water do not accumulate on terraces is recalled. Filtration that over time could affect the structures of the roofs must be avoided. Furthermore, the community will not be responsible for any repair due to neglect or lack of care in the maintenance corresponding to the owners.

**Earthing.**  
The **earthing installation** will be reviewed (not planned for this financial year).

The need to have an **individual insurance** policy contracted independently of the collective one managed by the Association is recalled.

In the event of a claim, it is recommended to inform the Board, the insurance agent and subsequently, if applicable, to report the claim to the individual or community insurance as appropriate.

The meeting is closed at 12:00 noon.

The President  
Lluís Puig Millán

The Vice-President  
José Fernández de Sevilla

Tossa de Mar, 15 August 2026
